

AMENDMENT TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings of claims in the application:

Listing of Claims:

1 - 26 (cancelled)

27. (Currently Amended) An outer decorative cover for a ttachment to a wireless communication device including a printed circuit board and an associated light source mounted in an interior of the wireless device, the outer decorative cover comprising:

an inner and outer surface; and

an optical fiber incorporated in a pattern ~~with~~ as part of the outer decorative cover and including an input end for receiving light from the light source when the light source is activated and the outer decorative cover is attached to the wireless communication device and a side surface which transmits the light therethrough along a length of the fiber when the light is received by the input end so as to cause the light transmitted along the length of the fiber to be visible when viewing the outer surface.

28. (Currently Amended) An outer decorative cover for a ttachment to a wireless communication device including a printed circuit board and an associated light source mounted in an interior of the wireless device, the outer decorative cover comprising:

an inner and outer surface; and

an optical fiber molded in a pattern ~~with~~ as part of the outer decorative cover and including an input end for receiving light from the light source when the light

source is activated and the outer decorative cover is attached to the wireless communication device and a side surface which transmits the light therethrough along a length of the fiber when the light is received by the input end so as to cause the light transmitted along the length of the fiber to be visible when viewing the outer surface.

30. (Previously Presented) An outer decorative cover as claimed in claim 27, wherein the optical member is embedded in the outer decorative cover.

31. (Previously Presented) An outer decorative cover as claimed in claim 27, wherein the optical fiber is adhered to the inner surface of the outer decorative cover.

32. (Previously Presented) An outer decorative cover as claimed in claim 27, wherein the optical fiber is adhered to the outer surface of the outer decorative cover.

33. (Previously Presented) An outer decorative cover as claimed in claim 28, wherein the optical fiber comprises an optical fiber thread.

34. (Previously Presented) An outer decorative cover as claimed in claim 28, wherein the optical fiber comprises an optical fiber panel.

35. (Previously Presented) An outer decorative cover as claimed in claim 28, wherein the light source comprises a plurality of light emitting devices, each light emitting device being adapted to emit light of a different color, and the optical fiber comprises a plurality of optical fiber threads, the input end of each thread being adjacent a respective one of the light emitting devices so that each thread transmits light of a different color.

36. (Previously Presented) An outer decorative cover as claimed in claim 28, wherein the light source comprises a plurality of light emitting devices, each light emitting device being adapted to emit light of a different color, and the optical fiber comprises a plurality of optical fiber panel portions, the input ends of each panel portion being adjacent a respective one of the light emitting devices so that each panel portion transmits light of a different color.

37. (Previously Presented) An outer decorative cover as claimed in claim 28, wherein the light source comprises a light emitting diode.

38. (Previously Presented) An outer decorative cover as claimed in claim 27, wherein the light source is positioned on the outer decorative cover.
